Narrative CV

Prof Othmar M Lehner is a full professor at the Faculty of Management, University of AS Upper Austria, a long term visiting full professor at the University of London Middlesex, and a long term visiting professorial fellow at the University of Oxford since 2014.

After graduation in Finance and Computer Science, with a strong quantitative focus on risk management, he worked as risk manager and head of risk management in a bank for 10 years, before he continued his academic calling towards a more sustainable economy with a doctorate in Economics and Business at the University of Jyväskylä, Finland (AACSB), with time spent abroad as researcher at Stanford U and the NYU, leading to a Doctor of Science.

He is also the honorary director of the ACRN Oxford Research Centre and serves the field in numerous roles, as author and keynote speaker, as industry project consultant, as editor in chief of the ACRN Oxford Journal of Finance and Risk Perspectives, as OECD expert in Impact Investing measurement and as regular guest lecturer at Cambridge and London Universities.

Prof Lehner has successfully managed large-scale research project portfolios and supervised numerous research teams amongst in industry-academia collaborative settings. In 2016 he became a chartered risk manager by the Austrian Standards (OENORM) organisation, and in 2018 a certified data scientist at the Fraunhofer IAIS Institute, Germany. He is also a member in good standing of the Global Association of Risk Professionals, GARP and of the Academy of Management.

He currently works on data science and platform approaches for finance and risk management that incorporate ESG (Environmental, Social and Governance) factors for an informed decision making given a hybrid logic, and on blockchain-enabled digital business models powered by artificial intelligence.

As a second focal point in his research he works in a multidisciplinary team aiming to examine the influence of cognition on big data. The current project looks at how an optimal visualization of data based on machine learning can reduce the cognitive load given specific tasks such as fraud detection or feature extraction. In this area, the team conducts extensive lab work, using amongst eye-tracking equipment, with Prof. Lehner as chief data scientist.

Dr. Lehner is extensively published in his field with an h-index of 17 and an i_{10} index of 19 and more than 1000 citations and has been responsible for many special journal editions. His latest book projects are the *Routledge Handbook of Social and Sustainable Finance*, Oxford UK, published in July 2016 and the

forthcoming book on *The Future of Impact Investing (Routledge, Oxford)*, bridging the voices of academics, industry and politics.

In 2018 he was nominated for the best international paper in management from the Academy of Management for the Carolyne B. Dexter award, and has won the best paper in the PnP division of the AOM Conference 2018 in Chicago.

Dr. Lehner is married, blessed with a grown-up daughter and lives in Austria and the UK.
